The workshop body is produced according to customer truck chassis with exact sizes and dimensions.

The workshop body is delivered to the customer as turn/key system.

All required attachments for assembling body to truck are sent by ALURA to the customer.

Easy assembling by just fixin U-bolts

Assembling guide : <https://youtu.be/BR-eLaYCUSs> (With new system the wood between chassis and body is placed under the body – no need to add wood – just fixing u-bolts is OK)

- ALURA do not supply truck units. The workshop box can be produced according to truck chassis what the customers have.
- ALURA workshop units are customizable and produced as body, container, trailer and semi trailer configurations.
- Some of finished projects can be reached here : <https://www.aluratrailer.com/index.php/mobile-workshop-trucks>
